

Our English lessons will initially focus on 'Journey to the Centre of the Earth' and we will use this model to write our own adventure stories.

We will then move on to non-fiction texts relating to our new topic 'Extreme Earth' and how to survive a Natural Disaster.

States of Matter

We will learn about Solids, Liquids and Gases, their material properties and the properties of their particles. We will also look at the Water Cycle and how water moves through the different states of matter. This learning will include a walk down to Headingley Water Treatment Works.

Spring 1 School Trip

Yorkshire Water, Headingley
SWIFTS - January 18, 2019
RAVENS - January 25, 2019

If any parents are able to accompany either class, please speak to Mrs de Klerk or Mrs Ord.

Multiplication and Division

Recall multiplication and division facts for multiplication tables up to 12×12 , recognise and use factor pairs, solve problems involving multiplying and adding, and harder correspondence problems.

Measurement (Area)

Calculating the area by counting squares, progressing to calculating base x height.

Topic: Extreme Earth

Our topic relates nicely to the science we are doing this term. We will first look at the structure of the Earth and how it can behave in an 'extreme' way, such as volcanoes, earthquakes, tsunamis and tornados. We will then move on to the Water Cycle and how it can influence these extreme behaviours.

Religion

We will be learning about the different faiths within our own community.

Class Blogs: to facilitate the learning process, we regularly post learning materials online. The content of the Class Blogs will enable parents to support their child at home.
